OUR CLEANUP IMPACT

How Did We Do?

Total Trash Collected **100 kg**

~ 4.3 kg/participant

Top 3 Items Found

Plastic packaging

Plastic bottles

Styrofoam

How Can I Make a Difference?

- Check out International Coastal Cleanup, which has a chapter at NUS or Ocean Conservancy, to learn more about marine conservation efforts.
- Support the conservation of blue carbon ecosystems by renting our Corporate Cleanup Toolkits here. Learn more about CarbonEthics' Blue Carbon Packages here.

- If you would like your organization to be greener, you can start with small steps to reduce the waste you generate.
- Plan in advance and encourage your employees through simple nudges to slowly cut out waste from your organization!

Next Time You're at the Beach/Park

1 Clean up after yourself!

Trash may be blown by the breeze into the water or vegetation

2 Take trash not shells

Leave behind organic items like seaweed, shells or dead animals as they belong to the natural ecosystem

3 Avoid Disposables

They may end up in the sea

4 Bring Your Own

Use reusable bottles, cups, containers and utensils to enjoy your food and drinks

5 Buy Canned Drinks

If you need to buy a drink, choose canned drinks over plastic bottles as they are more likely to be recycled

CERTIFICATE OF APPRECIATION

on Climate Action

This certificate is proudly awarded to:

K Marine

for participating in a Coastal Cleanup on 20 Sept 2024

This event supports the planting of 10 mangrove seedlings
which will absorb 200 kg of CO2e
