DATACARD® TRUCREDENTIAL SUITE SOFTWARE

TRUCREDENTIAL SUITE

PROTECT WHAT'S IMPORTANT TO YOU

TruCredential suite meets the needs of your unique program.

Possible Applications Include:

- Student, faculty and visitor IDs
- Employee, contract and visitor badges for both small and large organizations
- Patient and staff healthcare IDs
- Credentials for local government programs
- Membership and customer loyalty cards,
- Transit passes

Design, Issue and Manage Credentials — Anywhere, Anytime

Datacard® TruCredential software suite is an easy solution for creating, issuing and managing secure IDs and credentials. It empowers organizations to meet a wide range of application requirements, from basic photo IDs to high-assurance credentials. It offers a variety of editions for large and small organizations. With TruCredential suite, you can easily scale from a single workstation or user to a multi-workstation, enterprise-wide application with more functionality.

Great User Experience. Setting up card designs and printing them has never been easier. An intuitive step-by-step workflow makes issuing cards fast and simple. The software features effortless drag-and-drop functionality and the ability to customize the process to fit your needs.

Out-of-the-Box Integration. Get up and running quickly. TruCredential software easily integrates with your existing database or ERP system, Active Directory or any system that offers RESTful web services.

Configurable. Our configurable system allows you to create custom workflows for your operators. Operators can then work independently with these established templates and process flows. You can also create unique user profiles to enhance the security of your program and give appropriate access to the right people.

Technology That Grows with Your Organization. One technology platform can address both basic card issuance and integrated solution segment needs. A future-ready technology supports your features and scalability as your needs grow.

Entrust Datacard™

TRUCREDENTIAL PORTFOLIO FEATURES

Works with the Latest Technology

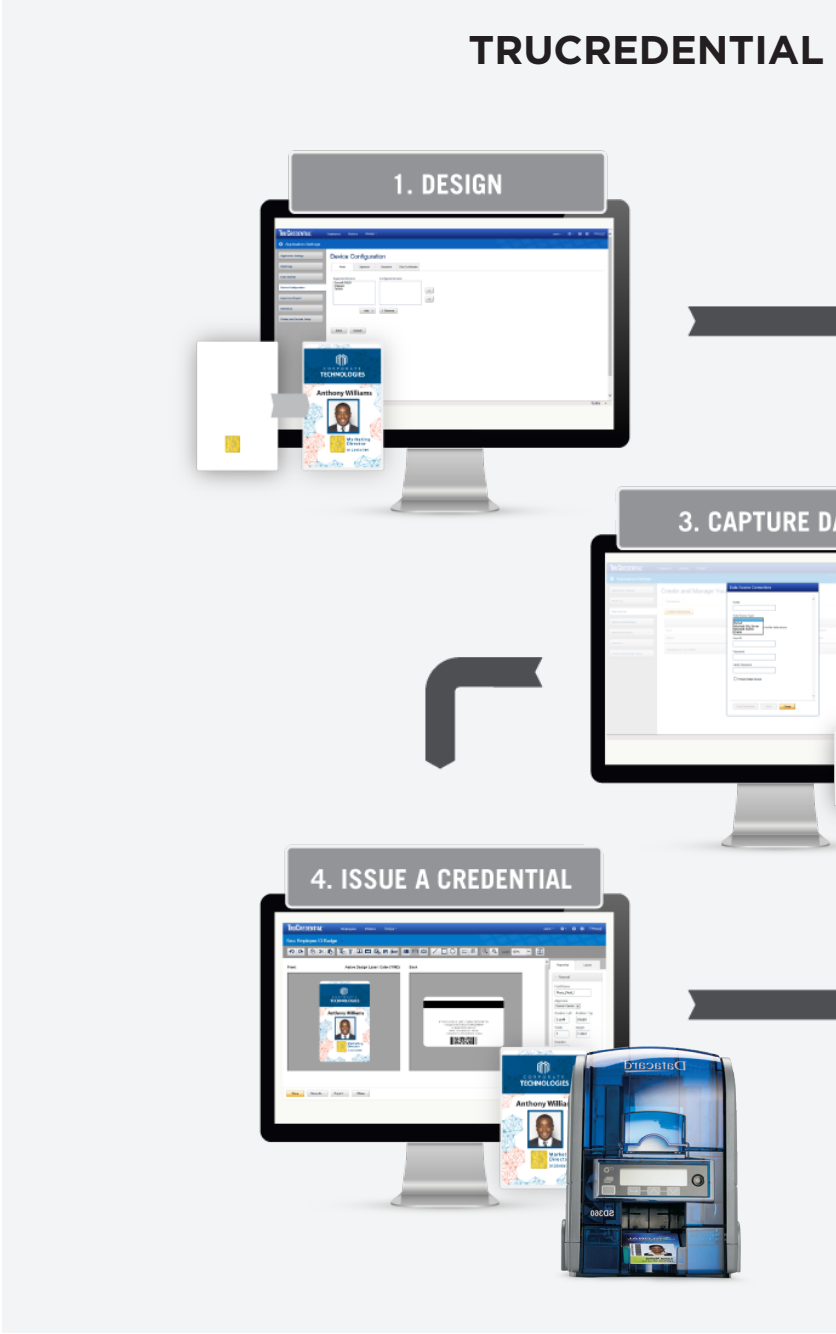

All editions of TruCredential software work with the latest technology, including Windows 10 and Microsoft Edge.

Part of a Complete Solution

TruCredential software is engineered to work as part of an integrated system with Datacard printers, supplies and support. Third-party printers are also supported.

Seamless Reporting Capabilities

Design reports with custom layouts, header, footer and data fields. Create and run reports. Export report output to PDF.

FOUR POWERFUL EDITIONS. ONE COMMON PLATFORM.

Basic Card Issuance | Integrated Solutions

TruCredential EXPRESS	TruCredential PLUS	TruCredential PROFESSIONAL	TruCredential ENTERPRISE
Take your first step into the world of ID card designing and printing with TruCredential EXPRESS.	This software builds on the functionality of TruCredential EXPRESS to provide fundamental tools for essential ID card and credential designing and printing, including reporting capability and SQL integration.	Get even more capabilities with this highly scalable edition that builds on the designing and printing functionality of TruCredential PLUS. The professional edition allows for concurrent users and centralized management of users and data.	The most advanced, scalable, credentialing software in the suite, ENTERPRISE edition includes all previous edition features plus sophisticated design capabilities for ultimate program flexibility. It also integrates with access control and HR systems.

CAPABILITIES

ADDITIONAL FUNCTIONALITY WITH INTEGRATED SOLUTIONS EDITIONS OF TRUCREDENTIAL SOFTWARE

Pre-built Smart Card Configurations

Pre-built configurations for smart card issuance are available and easy to set up through the user interface.

Supports up to 100 Concurrent Users

No need to purchase licenses for every work station. With TruCredential software, you only pay for operators who actively use the software at the same time. Up to 100 users can work simultaneously.

Easy integration with Existing Databases

TruCredential software integrates with databases that your organization already has, including Microsoft Access, DB2, SQL Server and Oracle.

KEY ADVANTAGES OF TRUCREDENTIAL INTEGRATED SOLUTIONS

Integration of TruCredential software (Professional and Enterprise editions) allows large organizations to easily deploy and manage their credentialing program across a network of work stations.

CENTRALLY INSTALL AND DEPLOY ACROSS THE NETWORK

Install and license TruCredential software on one server and deploy it across your entire network without the need for a physical dongle

MANAGE ALL OF YOUR DATA FROM ONE CENTRAL SERVER

Collect and manage data from all of your satellite devices on one central server

MANAGE ALL USERS FROM ONE CENTRAL LOCATION

Role-based access control restricts and grants users access to specific functions. Password reset for users is self-service.

SYSTEM REQUIREMENTS

Operating system:
Microsoft Windows 7 / 8.1 / 10

Web browser: Chrome, Internet Explorer v10 or v11
Memory: 4 GB (8GB recommended)

Hard Drive: 1 GB of computer drive space
Screen Resolution: 1360 x 768

TRUCREDENTIAL SUITE STANDARD FEATURES

Credential Design
- Front and back card design, pre-designed card templates
- Variable/static text field, photograph field, variable/static graphic field, date field
- QR code, magnetic stripe code, barcode support

Workflow
- Text field, static text field, static graphic field, date field, print count field
- Auto-sequence field, check box field, list field
- Text field mask, field option – read only, hidden, mandatory, searchable

Smart card Stock Supported
- MiFARE Classic
- MiFARE DESFire EV1, EV2
- HID Prox
- HID iClass
- HID iClass SE
- Sony FeliCa

Smart card Reader Supported
- Identiv
- DUALi (single-wire)
- DUALi (two-wire)

Database and Data Import
- Import data from CSV, ASCII file
- Text field, static text field, static graphic field, date field, print count field

Photo Capture
- File input, TWAIN, Microsoft Video for Windows

Language Support
- English, French, German, Japanese, Portuguese (Brazilian), Simplified Chinese, Spanish
- Localization utility for other languages
